Introduction

This Advanced CPTED workshop has been designed for practitioners who are already comfortable with the application of CPTED strategies and are looking for further professional development in the field, and an opportunity to have their skills formally recognised. Those who have worked with CPTED concepts and principles know the benefit they can bring to managing crime and behaviour related problems. The most basic and fundamental CPTED strategies can be useful in a wide range of settings, but frequently practitioners are limited in their ability to explore broader application of the concepts due to the limitations of their own environment.

This program extends the boundaries and includes the most requested topics from participant feedback sheets from Level 1 CPTED Workshops, including:-

- ➔ Recent research and current trends in CPTED
- ➔ Better understanding the roles of other professions in a multi-disciplinary approach to CPTED
- ➔ Consultation and building true ownership
- ➔ Litigation case studies involving CPTED
- ➔ Legislation, regulation, policy, standards and guidelines - understanding compliance, liability, and getting what you ask for
- ➔ Developing defensible approaches to CPTED reviews and strategy selection
- ➔ Developing and using crime risk assessment tools
- ➔ Understanding 2nd Generation CPTED
- ➔ Plans-based case studies
- ➔ CPTED & Urban Design
- ➔ Barrier free access

The program features a number of highly practical exercises designed to deliver maximum benefit to participants. You will also work through two interactive case studies which will cause you to consider the issues from two completely different perspectives.

Due to the interactive nature of this workshop, the number of available places is strictly limited. Don't miss this unique opportunity to build on your existing CPTED skills and network with like-minded professionals.

This street design creates a space shared by pedestrians and vehicles, which provides natural access control and good surveillance, enhancing perceptions of safety.

10 Great reasons to attend this workshop

1. You will have the chance to explore recent research and current trends in CPTED, and see how they can be applied in your context.
2. You will have the opportunity to test your CPTED knowledge and skills through an assessment exercise and receive a certificate attesting to your capabilities.
3. You will be involved in challenging and practical interactive case studies
4. You will see how using structured risk assessment tools can facilitate consistent assessment of specific problems.
5. You will be able to be involved in an exercise in which you will use a highly practical crime risk assessment tool.
6. You will review examples of CPTED strategies in action in a wide range of contexts.
7. On a display table you will have access to a reference library of security management and crime prevention materials.
8. A unique opportunity to discuss common problems with other crime prevention and security professionals.
9. An experienced workshop facilitator, who has both the practical experience and theoretical base to maximise the opportunity for you to learn.
10. Network with other security and crime prevention professionals from the public and private sector.

This workshop is an outstanding professional development opportunity which will enhance your chances for advancement.

10 Outcomes of the workshop

1. You will learn how to build upon your existing CPTED skills in a manner designed to give you a unique opportunity to approach problems differently.
2. You will better understand techniques for consultation and building ownership.
3. You will see how contributions from other disciplines are important in a complete CPTED solution.
4. You will gain knowledge to understand your obligations to legislation, regulation, policy, standards and guidelines.
5. You will review litigation studies and learn about the increasing role of CPTED principles in court.
6. You will be presented with a number of crime risk assessment tools and guidance on developing your own
7. You will further learn about the benefits your organisation can gain from CPTED strategies.
8. You will increase your knowledge and enhance your skills in crime prevention.
9. You will learn how to stimulate your staff to build, modify, and refine your security, loss prevention and crime prevention strategies.
10. You can immediately apply information from the workshop to improve the cost effectiveness of your security measures

Typical questions you will have answered

- ➔ How can I be sure that our organisation is making defensible crime prevention recommendations?
- ➔ How do I go about developing a crime risk assessment tool?
- ➔ How do I get other professions to understand and be willing to implement CPTED strategies in projects?
- ➔ How do I find out about relevant legislation, regulations, policy, standards and guidelines and how do I ensure compliance?
- ➔ Where do I obtain current literature / trends in CPTED and Crime Prevention more generally?
- ➔ Are there any standard crime risk assessment tools I can use in my situation?
- ➔ How do I guarantee that I will obtain support for the implementation of CPTED strategies?
- ➔ Are there any published Standards that I can use as a basis to support what I am trying to do with CPTED?
- ➔ What do other professions do to contribute to reducing crime and behaviour problems?
- ➔ How can scenario analysis be used in understanding crime and behaviour problems before a development is even approved?
- ➔ Do CPTED principles carry any real weight in litigation cases?

An excellent example of pedestrian scale lighting demonstrating how to decrease the perception of isolation and fear after dark.

CPTED Advanced Workshop Participants

This workshop is of practical benefit for participants from a wide range of backgrounds and professional disciplines, including:-

- | | | |
|-----------------------------------------------|---------------------------------|-------------------------|
| ▶▶ Academics | ▶▶ Engineers | ▶▶ Property Managers |
| ▶▶ Architects | ▶▶ Insurance advisors | ▶▶ Security managers |
| ▶▶ Community Crime Prevention Officers | ▶▶ Maintenance Supervisors | ▶▶ Security officers |
| ▶▶ Elected representatives (local government) | ▶▶ Military & defence personnel | ▶▶ Security consultants |
| | ▶▶ Planners | ▶▶ Trainers |
| | ▶▶ Police | ▶▶ Urban designers |

CPTED Advanced Workshop Program

Tuesday - Day 1	
08:00	Arrival coffee / tea
08:30	Introduction Review CPTED Fundamentals
10:00	Morning Tea
10:20	Applied Recent Research & Current Trends Legislation, Regulation, Policy, Standards & Guidelines
12:00	Lunch
13:00	From Social Planning to Target Hardening: Understanding contributions from all disciplines
14:30	Afternoon Tea
14:50	Litigation Case Studies: The increasing role of CPTED principles in court.
16:00	End of Day 1

Wednesday - Day 2	
08:00	Arrival coffee / tea
08:30	Understanding 2nd Generation CPTED
10:00	Morning Tea
10:20	CPTED & Urban Design Barrier Free Access
12:00	Lunch
13:00	Developing and Using Crime Risk Assessment Tools
14:30	Afternoon Tea
14:50	Practical Exercise: Crime Risk Assessment
16:00	End of Day 2

Thursday - Day 3	
08:00	Arrival coffee / tea
08:30	Plans Based Case Study: From Concept to Construction
10:00	Morning Tea
10:20	Plans Based Case Study: From Concept to Construction Cont.
12:00	Lunch
13:00	Assessment Findings & Discussion
14:30	Afternoon Tea
14:50	Assessment Findings & Discussion Cont. Certificate Presentation
16:00	Workshop Close

What to Bring / Checklist

- ➔ Send any special questions you would like addressed during the workshop at least 1 week prior (ismcpi@ismcpi.org)
- ➔ Bring any plans/drawings you would like discussed during the workshop.
- ➔ Ensure you let us know of any special dietary or other requirements.
- ➔ Book any accommodation required. It is recommended that if you are travelling to the workshop, you aim to arrive the afternoon of the day prior to the start of the program.
- ➔ Registration is open from 8am and the first session will commence promptly at 8:30am on each day of the program.

CPTED in Practice

Removable bollards and clear line of sight enhances natural access control and territorial reinforcement. Restricting vehicular access enhances pedestrian safety.

Workshop Facilitator - Mr Rick Draper

Rick Draper is Managing Director and Principal Advisor with Amtac Professional Services Pty Ltd, an independent security and crime prevention consulting practice. Rick has been involved with crime prevention and security for twenty years and has project experience in Australia, New Zealand, Papua New Guinea, Asia and Canada.

Rick received his initial CPTED training in the early 1990s under the tutelage of the well known and respected CPTED practitioner and author, Tim Crowe. These practical insights have been complemented by formal studies in crime prevention through Griffith University

In 1995, Rick was part of a team that conducted what was at the time the largest single CPTED review project ever undertaken in Australia. The project team reviewed 169 public transport locations and their immediate environs, addressing environmental design and use issues which impacted upon the incidence and the fear of crime, including factors influencing the application of physical and electronic security measures. Since that time he has conducted numerous CPTED audits and provided advice to a wide range of clients in a variety of settings, including university campuses, health care facilities, retail, public transport, office buildings, car parks, schools, local and state government facilities, and public spaces.

Rick is a Director of the International CPTED Association (ICA). He has written and presented numerous papers and articles on a diverse range of topics in the areas of crime prevention and security, including authoring chapters for the third and fourth editions of the Handbook of Loss Prevention and Crime Prevention.

Rick is an Adjunct Senior Lecturer in Security Management and Crime Prevention in the School of Criminology and Criminal Justice at Griffith University in Queensland. He has been the principal facilitator for this CPTED workshop since 1995.

Workshop Facilitator - Mr Tony Lake

Tony Lake has recently joined the team at Amtac Professional Services as a Senior Security & Crime Prevention Advisor.

Tony was a member of the Queensland Police Service (QPS) for more than 30 years. He was attached to the Office of the Commissioner where he developed CPTED Guidelines for the State of Queensland and CPTED policy and training for the QPS. Until 1990, he was an operational police officer serving in various parts of Queensland. In 1990, Tony was promoted to the rank of Inspector and was one of three officers tasked with the implementation of community policing in Queensland.

In the early 1990s he was a member of the project team formed to develop the 'Police Beat' Shopfront Program and was responsible for the development of the school based policing program for Queensland. During that time he introduced Crime Prevention Through Environmental Design (CPTED) to the QPS.

Tony is a Director of the International CPTED Association (ICA). He chaired the organising committee for both the 6th and 9th ICA CPTED Conferences held in Brisbane in 2001 and 2004, and co-authored and presented a paper at CPTED-2005 in Chile.

Tony has delivered presentations on CPTED at the International Policing Conference, Illuminating Engineers Society of Australia & New Zealand, NZ Ministry of Justice and the Local Government New Zealand Community Safety Conference, and workshops for organisations such as Christchurch, Auckland, North Shore, Papakura, Porirua and Selwyn City and District Councils, Community Patrols NZ, Neighbourhood Support NZ and New Zealand Police. He has assisted with the development of CPTED solutions for problem areas in Napier, Turangi, North Shore, Christchurch, Porirua and Rolleston.

This public space features good natural surveillance supported by appropriate signage, lighting and maintenance.

ISMCPPI is serious about ensuring that its professional development programs not only meet, but regularly exceed the expectation of our clients. Below are some of the comments made by participants at programs in the past.

"Extremely valuable and relevant for my job. Difficult to find similar training so it is excellent to have this course available.."

Alison Banks, Waitaki District Council, New Zealand

"It is a very comprehensive and sophisticated course. Broadened my knowledge to use this valuable concept in my working area" Chan Se Loy, Hong Kong Police

"I found the networking with participants from different backgrounds and locations to be of benefit. An excellent way to upskill and gain knowledge."

Alan Bowman, Education QLD, Australia

"Great workshop for helping to implement practical solutions"

Fiona Wilkes, Christchurch City Council, New Zealand

"Meeting & interacting/sharing experiences with people from other diverse fields and backgrounds along with program content will be a great asset and reference source in my future work" Kevin Anger, Illawarra Health, Australia

"This workshop has benefited me personally as well as professionally. It has highlighted the importance of considering crime prevention issues at the forefront of decision making, and not to be treated as an after thought."

Peseta Konelio Tone, National University of Samoa

"I found the material of CPTED fitted excellently with the demands of my work in community-based crime prevention"

John Mallett, Mackay Crime Prevention Partnership, Australia

Murals are an indication of ownership in the community and are effective as a defence against graffiti.
